

## THE BEAN

We begin with the finest organic coffee beans, which are grown in the heart of the Mantiqueira de Mina Mountains in Brazil at around 1300m above sea level, with the ideal climate for coffee growing.

ELEVATION: 1300 m  
CHARACTER: FULL BODIED, AROMATIC

## THE ROAST

Our roaster produces each batch to strict quality measures. The roast characteristics are specifically designed to create the very best Espresso Martini; with a long roast and a high temperature. This creates a super rich, dark and aromatic blend.

ROAST TIME: 32.5 min  
TEMPERATURE CURVE: 160°C - 190 °C

## THE GRIND

Flavour is a delicate thing. We ensure that our raw ingredients are always as fresh as possible. Our hot brew options are as fresh as you will find, and our cold brew grinds come straight from the source to your glass. You will not find a fresher Espresso Martini.

## THE BREW

We have fine tuned our brewing to compliment each Martini on our menu. Our cold brew coffee is steeped for at least 24 hours to maximise flavour, intensity and clarity. It's then pressed to provide the perfect espresso. Cold brewing prevents dilution when mixed with ice, ensuring a robust flavour every time.

### SOMETHING TO WAKE ME UP AND ME UP!

AN ESPRESSO MARTINI ORIGIN STORY

There are many many claims to the origin of the Espresso Martini. One of the most famous is that it was created by Dick Bradsell in the late 1980s while at Fred's Club in London. The story goes that a young lady asked for something that would "Wake me up, and \*\*\*\* me up." And the rest, we suppose, is history.

Bradsell was quoted in relation to his invention of the drink, "The coffee machine at the Soho Brasseries was right next to the station where I served drinks. It was a nightmare, as there were coffee grounds everywhere, so coffee was very much on my mind. And it was all about vodka back then - it was all people were drinking."
